

Pain Therapy

Lasting pain relief during the night

A horror story that is repeated every night: After just a few hours, pain becomes rife. Falling back to sleep is out of the question. Awakened in the middle of the night, the person enters a cycle of pain and sleeplessness.

Fields of application:

No matter what causes the pain

- arthrosis
- osteoporosis
- cancer
- injury

ThevoRelief provides pain-relieving positioning and gentle stimulation of the nerve tracts, the basis for restorative sleep.

autonomic nervous system

“The anti-pain mattress, ThevoRelief, supports and soothes my aching body parts and improves my well-being. I sleep longer and better. Finally I am able to bear the pain.”
