

ROHO® HIGH PROFILE® Single Compartment Sensor Ready™ Cushion

The tall, interconnected 4.25 in. (10.5 cm) individual air cells envelop you to redistribute pressures and decrease friction and shear. These taller air cells provide a greater contact area and maximum immersion and envelopment – which promotes healing.

With the available Smart Check sensor, you can be sure that with the press of a button, your Sensor Ready cushion is inflated to the proper level.

Pressure injury prevention and treatment

Adaptability

Personal inflation monitoring

Adjustability
