

multi slings

The Multi Sling is the perfect sling for gait training and rehabilitation exercises. It is suitable for patients with some degree of body stability and can be used for dressing and undressing and visits to the toilet. It is made of durable Polyester and comes with a full assortment of accessories for additional support and versatility.

Multi Use

The Multi Sling is designed to act as support while doing standing, walking and balancing exercises, however, it can also be used for dressing and undressing and visits to the toilet. It consists of different parts - a chest belt, groin support and shoulder support. The Multi Sling can be used with either 2-point, 3-point or 4-point suspension and the user of this sling must have partial use of their legs.

Full Range of Accessories

The Multi Sling offers a full range of optional accessories that increase its functionality. The chest belt can be used as a support during walking and balancing exercises and, when combined with the hip belt, it allows

patients with functional impairments (such as stroke) to use the product. For extra comfort the neck cushion can be used and for added security, the groin support or a waist belt.

Easy Care and Easy Fit

Our slings are manufactured to the highest quality standards. They feature reinforced straps and high strength nylon webbing around the sling to make them strong enough to resist even the most active use. Each sling label is colour coded to ensure quick and easy selection of the correct sling and the straps are colour coded for easy determination of required positioning.
