Canadian / Order Form Convaid Trekker 2 - HCPCS E1234

\*\*\*The Trekker Transit option includes four manufacturer installed red wheelchair transportation anchors. The Trekker Transit model has been crash tested and conforms to RESNA WC19 standards. Anthropomorphic Test Device weights are TR12T 75lbs/34kg and TR14T 110lbs/50kg.

The Convaid Trekker Mobility Base was tested with the Trekker Seating Module equipped with a head support and wheelchair anchored pelvic lap belt. Do not use the foot positioners on the Convaid Trekker during transit in a motor vehicle. The performance and safety of accessories and/or other seating options not tested by Convaid is unknown, and no warranty or claim about their performance is or can being made.

Furthermore, when being transported in a vehicle it is Convaid's position that the wheelchair user transfer from the wheelchair into appropriate vehicle seating during transportation. Please note that at this time, the Department of Transportation has not officially approved any tie-down system for a user while in a wheelchair, therefore Convaid cannot recommend a transit system.

For more information on RESNA WC-19 and WC-20 standards please visit http://www.rercwts.pitt.edu/WC19.html.

HCPCS codes are provided for your convenience and are NOT to be considered billing or legal advice. Providers are responsible for insuring that appropriate billing codes are used when submitting claims. Proper use of HCPCS codes does not insure coverage or payment. Contact the appropriate payer for coverage information.
