

**WALKING JACKET**  
FOR MAXIMUM PATIENT COMFORT

...with people in mind

# DESIGNED FOR REHABILITATION

The *Walking Jacket* has been designed to be used in conjunction with the mobile *Maxi Move* and the overhead *Maxi Sky* ceiling lifting systems. It will enable therapists and carers to effortlessly aid patients with standing, stepping and walking practice.

Unisex in design, and available in five sizes from extra small to extra large, the *Walking Jacket* offers a simple, secure and comfortable solution to standing, stepping and walking problems.

The *Walking Jacket* can be easily used by a patient sitting in a chair, avoiding the chance of a potentially hazardous manual handling situation. For maximum patient comfort, it has been designed so no excessive pressure is placed on the chest.

With patient security a top priority, once the patient is in a standing position, the *Walking Jacket* is fully supportive in the event that the patient collapses or loses balance.

With its unique design features, the *Walking Jacket* is fully adjustable to fit a variety of patient sizes and allows uninhibited walking action.

Only ArjoHuntleigh designed parts, which are designed specifically for the purpose, should be used on the equipment and products supplied by ArjoHuntleigh. As our policy is one of continuous development we reserve the right to modify designs and specifications without prior notice.
