

Theraputy Exercises

for use with Parsons Theraputy

GROSS OPPOSITION 1

Flatten the Theraputy into a circle and stick it on a flat surface. Place fingers and thumb lightly on the edge of the circle. Pull fingers together toward the center of the circle.

GROSS OPPOSITION 2

Create a cone shape and stick it on a flat surface. Place fingers and thumb over the cone and lightly into the Theraputy. Pull up on the cone, bringing fingers and thumb together.

Consult a physiotherapist for the exercise programme best suited to your needs. Not all exercises are appropriate for all patients.

GROSS FINGER FLEXION 1

Roll Theraputy into a cylindrical shape and hold on the palm of your hand. Make a fist, bending fingers around the Theraputy.

GROSS FINGER FLEXION 2

Make a roll of Theraputy and connect ends together to create a ring. Place thumb and fingers in the center and spread fingers out against Theraputy.

GROSS FINGER FLEXION 3

Set Theraputy on a flat surface. Place hand palm down with fingers bent into Theraputy.

Push finger tips into the Theraputy and push Theraputy away while straightening our fingers.

INDIVIDUAL FINGER FLEXION 1

Make a sheet of Theraputy and wrap it around a finger. Bend the finger through the Theraputy, trying to touch your palm.

INDIVIDUAL FINGER FLEXION 2

Make a small ring of Theraputy. Place your finger and thumb in the hole of the ring. Spread the finger away

from your thumb. Stabilizing your thumb on a table may allow you to use your finger more effectively.

THUMB FLEXION

Make a roll of Theraputy. Wrap your fingers around the roll and press your thumb deeply into the Theraputy, and then lift your thumb out slowly.

OPPOSITION 1

Place a piece of Theraputy between the tips of your thumb and index finger. Squeeze Theraputy until your finger meets your thumb. Repeat with other fingers.

OPPOSITION 2

Place a piece of Theraputy between the side of your index finger and the tip of your thumb. Squeeze Theraputy until your thumb meets your finger.

OPPOSITION 3

Hold a lump of Theraputy in one hand. Make a cone. With thumb and finger pads, pick off small pieces of Theraputy by twisting and pinching at the narrow end of the cone. When finished, gather small pieces and remold into large piece.

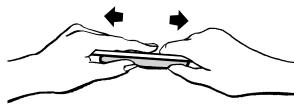

OPPOSITION 4

Make a roll of Theraputy and place it between your thumb and the pads of your index and middle fingers, making a triangle. Squeeze through until your fingers meet.

INTRINSIC STRETCH

Place your arm on the table with your palm facing up. Put a roll of Theraputy at the base of your fingers. Curl your finger tips into the Theraputy without moving your big knuckles.

INTRINSIC FUNCTION

Place a thin piece of plastic or wood under the fingers and put the Theraputy between the piece and your thumb. Squeeze, keeping the little knuckles straight and the big knuckles bent. Hold this position while pulling the piece of plastic and Theraputy away with the other hand.

Colour	Resistance	2 oz.	1 lb.
Blue	Firm	15E310	15E315
Green	Medium	15E311	15E316
Red	Soft	15E312	15E317
Yellow	Extra Soft	15E313	15E318
Tan	Extra Extra Soft	15E314	15E319

FINGER ABDUCTION

Make a large ring of Theraputy and place around the middle joints of your four fingers. Spread fingers apart sideways against the Theraputy.

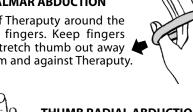

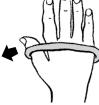

THUMB & FINGER ABDUCTION

Place a piece of Theraputy between two fingers and squeeze through until the two fingers meet.

Place a ring of Theraputy around the base of your fingers. Keep fingers straight and stretch thumb out away from your palm and against Theraputy.

THUMB RADIAL ABDUCTION

Place a ring of Theraputy around the base of your fingers. Keep fingers straight and stretch thumb sideways away from your palm and against Theraputy.

GROSS FINGER & WRIST EXTENSION

Roll Theraputy into a roll using a back and forth motion. Keep fingers and wrist stretching up.

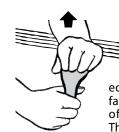

Notice: Do not allow Theraputy to come in contact with hair, fur, rugs or fabric for any period of time: it is very difficult to remove once it penetrates the fiber. A surface cleaner or careful application of 95% isopropyl alcohol with repeated brushing and blotting may be tried. Check the colourfastness and resistance to fiber damage prior to applying on an exposed area. Theraputy may be frozen with an ice cube and then picked out. Do not microwave.

WRIST FLEXION

Place forearm and elbow of the injured hand on the table. Let the wrist hang over the edge of the table with the palm facing up. Slip the

Theraputy between the ring and middle finger and into your fist. Pull up on the Theraputy with the injured wrist.

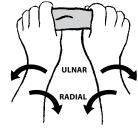

WRIST EXTENSION

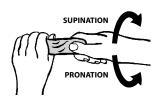

Place forearm and elbow of the injured hand on the table. Let the wrist hang over the edge of the table with the palm

facing down. Grip each end of a roll of Theraputy. Pull up on the Theraputy with the injured wrist.

ULNAR & RADIAL DEVIATION

Place forearms on a table palms down. Hold Theraputy, one end in each hand. Hold one hand steady while the other rotates towards the little finger for ulnar deviation and towards the thumb for radial deviation

PRONATION & SUPINATION

Place forearms on a table with the uninjured hand palm down. Place the injured hand on its side

with the thumb up. Twist and touch the injured hand's palm to the table (pronation). Twist and touch the back of the hand to the table (supination).

HORIZONTAL ABDUCTION

Place your arms in front of your body with elbows straight. Grasp one end of the Theraputy with each

hand. Pull arms and hands apart slowly, stretching the Theraputy until it is thin.
